

Business Central Power BI Reporting

UNLOCK BUSINESS INSIGHTS

Gain instant insights with 400+ plug-and-play Advanced Power BI reports built for Business Central, helping you make faster decisions and save hours on reporting.

Plug & Play

No coding or development required.

Easy Setup

Connect in minutes, not days.

Real-time

Live financial and operational reporting.

The Challenge:

Business Central's standard reports often fall short, they're static, limited in scope, and rarely flexible enough for your specific business needs.

Customising them can take weeks, require developers, or rely heavily on Excel, which increases the risk of errors and outdated information.

This leads to frustration, reporting delays, and a lack of trust in the numbers, all while preventing teams from making timely, informed decisions.

Solution: Business Central Insights

Business Central Insights gives you 400+ ready-made Advanced Power BI reports built for Business Central.

Each report connects directly to your live data, covering areas like Finance, Sales, Inventory, Manufacturing, and more.

You'll get one secure, consistent view of your business with flexible dashboards to analyse results by company, currency, or dimension, all in seconds.

With BCI, you can:

- Replace static reports with live, interactive analytics
- Remove manual Excel work and improve data accuracy
- Monitor trends and performance in real time
- Empower every department with insights they can act on

"With Business Central standard reporting we were dealing with duplicate data, inconsistencies, and inefficiencies in our reporting process."

Jacob Liang, OPED

"The reports didn't just give us answers – they exposed problems and pointed us toward solutions,"

Robert Walker, Hutchinson Engineering

"Our leaders are over the moon, they're finally making decisions rather than spending time pulling reports,"

Neville Glenn, Hutchinson Engineering

Instant Value

Start analysing your data in minutes

Trusted Data

One reliable view across all companies and currencies.

Self-Serve Analytics

Empower everyone with simple, interactive dashboards.

Dedicated Support

Ongoing help, training, and updates from the BCI team.
