

## **Aries Email 1: “ OPED obtained real time Business Central reporting”**

Subject: Real-time Business Central reporting?

Preview Text: How OPED obtained real time reporting

### **Body:**

OPED, a global manufacturing and technology company, struggled with Business Central's standard reports, especially for multi-company and multi-country reporting, which required slow to produce, manual and error prone spreadsheets.

“Sales needed up-to-the-minute figures, and our warehouse team needed visibility into stock and order fulfillment so they can chase vendors promptly if there is a problem. Failure to do so means our customers will not get products on time and made it very difficult to commit to a specific delivery day, ultimately leading to a poor customer experience.”

**Danny Wang, ERP Project Manager at OPED Australia,**

Find out how OPED replaced manual reports and spreadsheets with real-time dashboards.

Email 3: "OPED's BC reporting transformation feedback?"

**Subject:** Did OPED's BC reporting revolution resonate?

**Preview Text:** Would {company\_name} benefit from improved Business Central reporting?

**Body:**

OPED obtained real-time access to critical Business Central insights across multiple countries & companies, automated month-end reporting, and empowered every team from finance to sales and operations to make faster, data driven decisions.

More importantly OPED were able to setup this capability in minutes without specialist IT, or data professionals or any expensive technology!

"We needed a solution that could provide accurate, real-time data directly from Business Central without the need for additional specialist resources or complex infrastructure. BCI allowed us to consolidate our data and provide real-time reports to our sales and warehouse teams, as well as senior management." **Danny Wang, ERP Project Manager at OPED**
